## SOLAR LED INTEGRATED COMMERCIAL AREA LIGHT

Project: \_\_\_\_\_

Type: \_\_\_\_\_ Quantity: \_\_\_\_\_

The RSL Series solar LED round luminaire is a versatile lighting solution designed for a variety of spaces, from commercial and parking lot spaces to recreational bikeways and public areas. Its self-contained design flawlessly integrates solar power, adaptive control, and LED technologies into a compact, efficient form. With its sturdy construction and outstanding performance, the RSL series delivers cost-effective, full-cutoff lighting wherever it's required.

Using solar power and LEDs, the RSL series is completely self-contained and offers significant benefits:

- Cost-effective design ships fully assembled and installs in minutes
- Wireless control & communication with your light
- Low installation cost and minimal site impact with no trenching, cabling or wiring
- Minimal ongoing costs with no electrical bills or bulbs to change
- Operates entirely independent from the grid and is immune to power outages
- A sustainable choice without recurring carbon emissions

All of our solar powered lights are enabled by our innovative Solar Lighting Controller (SLC). The SLC in each light is “self-learning” and allows the lights to predictively adapt to their surroundings, providing a level of lighting performance and reliability unavailable in other solar lighting products.
